

TRAFFIC LOOP CIRCLE CUTTER

Wolverine Equipment is pleased to offer the only Traffic Loop Circle Saw on the market today. Traffic detector loops are cut quickly and cleanly with the W-60CC. In addition, they will maintain a uniform depth over the entire cut - something that inspectors require and core drilling systems cannot provide.

FEATURES

- 60HP Kubota Turbo Charged Diesel Engine
- Blade capacity of 14" - 18"
- Cuts 6 foot diameter circles
- Hydraulic raise and lower
- 1-7/16" spindle with tapered roller bearings
- Twin mounted side night lights
- Standard 14" blade guard included
- Heavy Duty lifting bar
- Hydraulic actuated pivoting plant
- Lifting eye and handles allow for ease of portability
- Unit is powder-coated for longer wear
- Meets all EPA requirements

OPTIONAL EQUIPMENT

- Electric water pump
- Catalytic converter
- 18" Blade guard
- Loop Blades 12", 14", 18"
