

TRAFFIC LOOP CIRCLE CUTTER

Wolverine Equipment is pleased to offer the only high HP Traffic Loop Circle Saw on the market today. The **W-60LS** cuts quickly and cleanly, maintaining a uniform depth over the entire cut - something that inspectors require and core drilling systems cannot provide. The new **Two-Way W-60LS-ST** has dual modes to allow both straight and circular cutting. Now one saw can perform all the cutting required to complete traffic detection installation jobs.

FEATURES

- 60 HP Kubota turbo charged diesel engine
- Blade capacity of 14" – 18"
- Cuts 6' diameter circles
- Hydraulic raise and lower
- 1-7/16" spindle with sealed, maintenance-free bearings
- Twin-mounted side night lights
- Standard 14" blade guard included
- Hydraulic activated pivoting plan
- Handles for easy portability
- Powder coated frame for longer wear
- Tier 3 / Interim Tier 4 emissions compliant engine

TWO-WAY LOOP SAW – EXTRA FEATURES

- Straight or circular cutting modes
- Use straight mode for connecting loops and for homerun cuts
- Easy transition between straight and circle cuts (no tools required)
- Eliminates need for second saw on job

OPTIONAL EQUIPMENT

- Electric water pump
- Catalytic converter
- 18" blade guard
